

STAGE DIMENSIONS / DELIVERIES

MAIN STAGE (FIRST FLOOR)

MAIN STAGE DIMENSIONS

Width: max.16 m

Depth: max.16 m

Scene dimensions depend on surround masking and/or wings

height: to the underside of grid: 7,80 m,

height: to the underside of truss/bar: 6,30 m

LIGHTING AND SOUND DECK

Open operating desk positioned centre back of the house seating (see main stage plan)

FLOOR

Throughout: Pitch pine stage boards laid over a (lightly) sprung basket weave under construction

Load-bearing capacity: 500 kg / sqm.

The floor can be drilled/pierced.

The floor is of soft wood therefore all loads must be well distributed and moved on wide pliable rollers. (e.g. A grand piano cannot stand on steel rollers). Heavy loads must to be approved in advance.

The floor colour is middle to dark brown wood tone.

FIRE REGULATIONS

The theatre is classified under NRW public assembly regulations (VstättV) as an open performance space.

Please note: In deviation to VstättV regulations, stage materials must meet German B1 fireproof standards. Any materials that can be set alight by a naked flame do not conform to B1 standards and must be treated with "Flammex" or an equivalent flame retardant substance.

B1 standards must be observed at all times and, if necessary, guest companies must supply proof that their materials meet the required standards.

UNUSUAL FEATURES

The stage has a gradient of 1%!

The stage walls are off-white in colour and can be masked with black drapes

Air conditioning units mounted on the sidewalls extend 1,50 m into the stage space on both sides.

The distance between the opposing units is 13m
